CHAPTER 1

HOW TO USE THIS MASTER GUIDE

This guide contains **two complete interpretations of Ahri in 2XKO**:

◆ ZONER VARIANT

The Zoner Variant emphasizes screen control through projectile management. Orb placement, wall bounces, and spacing discipline define this playstyle. Best for players who enjoy positioning, reads, and setting traps.

● RUSHDOWN VARIANT

The Rushdown Variant emphasizes aggressive pressure through air mobility and rekka chains. Air dash mixups, oki setups, and corner carries define this playstyle. Best for players who enjoy momentum, mixups, and execution.

|| 1.1 Reading This Guide

Core content (Move Lists, Frame Data, Mechanics, Neutral Game, Mixups) is shared between both variants. When playstyle-specific information appears, it's marked with:

- ► **ZONER**: Details specific to the zoning playstyle
- ► **RUSHDOWN**: Details specific to the rushdown playstyle

Choose the variant that resonates with your playstyle, or learn both for maximum flexibility.

|| 1.2 Guide Structure

This guide is organized into the following chapters, each building on the previous:

#	Chapter	Contents
1	How to Use	Guide conventions, playstyle overview
2	Champion Overview	Who is Ahri, stats, strengths & weaknesses
3	Move List Reference	All normals, specials, supers, assists with notation
4	Frame Data	Startup, on-hit, on-block values; practical applications
5	Unique Mechanics	Air dash, Spirit Rush, Foxfire rekka, Bounce!, oki dart
6	Neutral Game	Buttons, anti-air, air-to-air, pillar strategies
7	Mixup System	Strike-throw, overhead, crossup, wakeup oki
8	Combo Guide	Beginner through advanced routes with notes
9	Matchup Strategies	vs. Rushdown, Zoner, Grappler, Balanced
10	Team Compositions	Partner synergies, assist usage
11	Advanced Concepts	Air mobility mastery, patch notes, common mistakes

1.3 Skill Level Recommendations

★ WHERE TO START

- **New to Ahri:** Read Chapters 2–3, then jump to Chapter 8 (Beginner Combos). Return to mechanics as needed.
- **Intermediate:** Focus on Chapters 5–7 for mechanics depth and mixup trees.
- **Advanced:** Chapters 8–11 cover high-level routing, matchup reads, and optimization.

CHAPTER 2

CHAMPION OVERVIEW

|| 2.1 Who is Ahri?

Ahri is the Spirit Fox of Ionia—a celestial enchantress who uses mystical orbs and supernatural charm to manipulate the battlefield. In 2XKO, Ahri occupies a unique position: she can be played as either a **Zoner** or **Rushdown** character depending on gameplan and team composition.

Her kit rewards creative, strategic thinking with omnidirectional mobility (Spirit Rush), safe pressure strings (Foxfire Blast rekka), and setup-heavy oki tools (Stalking Dart). With only **900 HP**—tied for the second lowest in the game—she demands execution and precision, but one good confirm leads to devastating, corner-carrying combinations.

|| 2.2 Playstyle Comparison

Aspect	Zoner	Rushdown
Core Tool	Orb projectiles at all ranges	Air dash and rekka pressure chains
Gameplan	Control screen with spacing discipline	Approach aggressively through air mobility
Win Condition	Force approaches into poke range	Land combo to establish corner pressure
Neutral Strategy	Fullscreen orb loops; avoid close range	Jump/dash in; bait anti-air; land confirm
Oki Strength	Stalking Dart positioning; wall bounces	Foxfire safe strings into mixups
Weaknesses	Low raw damage output; predictable patterns	Requires execution; heavily meter-dependent

2.3 Strengths and Weaknesses

↑ Shared Strengths

- Only character with traditional air dash—forward and backward
- Omnidirectional Spirit Rush (8 directional movement with attack)
- Safe pressure strings through Foxfire Blast rekka system
- Strong anti-air options with meaty upward normals
- Stalking Dart persists on tag for persistent layered pressure
- Charm ultimate creates tick-throw and overhead opportunities
- Excellent team flexibility; works in any position

↓ Shared Weaknesses

- Second lowest health in game (900 HP)—fragile
- High execution skill floor; low damage without demanding combos
- Backdash slowed in Season 1—escape less evasive
- S2 Super now properly in active frames—interrupts more easily
- Charm startup (19f) is reactable without setup
- Projectiles not full-screen—limited zoning range
- Very matchup-dependent

CHAPTER 3

MOVE LIST REFERENCE

3.1 Notation Guide

★ TIP

Ahri guides use **numpad notation**. Think of a numpad: 5 = neutral, 6 = forward, 4 = back, 2 = down, 8 = up, 9 = up-forward (jump). **j.c.** = jump cancel, **[X]** = hold input, **j.** = jumping version, **AD** = air dash.

2XKO Button Notation Reference

Light	Medium	Heavy	Throw
Super 1	Super 2	Down	Forward
Back	Up	Plus	Next

Symbol	Meaning
>	Cancel/chain from previous move into next
,	Link (requires strict timing) from previous to next
~	Follow-up/cancel into multi-stage move
dl./delay	Delay the following move slightly
j.	Jumping version of attack
jc.	Jump cancel into next action
land	Must land before continuing combo
[H]	Hold button for charged version
AD	Air dash cancel
UF/DF	Up-forward / Down-forward direction

3.2 Normal Moves

3.2.1 Ground Normals

Input	Name	Notes
5L	Fox Jab	5f startup; fastest normal; strong interrupt/tick throw tool
2L	Crouching Jab	6f startup; godlike low poke; safe on block
5M	Spirit Claw	10f startup; best medium range in cast; primary footsie
2M	Crouching Claw	9f startup; reliable mid-range low; combo starter
5H	Fox Spirit	13f startup; large vertical hitbox; long range
2H	Celestial Ascent	15f startup; anti-air; advances forward
3H	Spirit Dive (Launcher)	18f startup; primary launcher; excellent combo starter
66H	Run H	Advancing heavy; strong pressure extender

3.2.2 Air Normals

Input	Name	Notes
j.L	Air Light	Strong air-to-air; good horizontal range; deceptively fast
j.M	Air Medium	Primary combo extender in air strings
j.H	Air Heavy	Go-to air-to-air; counter-hit leaves opponent in hitstun until landing
j.[H]	Charged Air Heavy	Extended combo properties; use half-charge for optimal damage
j.2L	Falling Spark	Hits on both sides; perfect for ambiguous crossups
j.2H	Air Down Heavy	Downward-angled; good for catching grounded opponents

3.2.3 Key Ground Normal Properties

Move	Range	Type	Special	Primary Use
5L	Close	High	Interrupt	Strike-throw starter; fastest button
2L	Close	Low	Safe	50/50 setups; tick-throw tool
5M	Mid	High	Whiff	Best footsie; primary poke
2M	Mid	Low	—	Combo starter; pressure low
5H	Long	High	Check	Neutral poke; range check
3H	Mid	Launch	Launcher	Primary combo starter

3.3 Command Normals

Input	Name	Notes
3M	Swept Away	Hard knockdown on hit. Sets up mixups. PRIMARY oki tool
j.2L	Falling Spark	Hits on both sides; crossup tool after knockdown
3S2	Bounce!	Overhead command normal. Cancels into Air Dash—core mixup tool

3.4 Special Moves

Input	Name	Notes
5S1 / j.S1	Orb of Deception	3/4-screen rekka projectile. AIR OK. ↓ 18f startup, was 16f
2S1	Orb Arc	Lob arc trajectory; optimal for oki setups and wall bounces
6S2	Spirit Rush Forward	Omnidirectional dash. 5 directions grounded; 5 airborne
8S2	Spirit Rush Up	Vertical mobility; escape tech and aerial extension
4S2	Spirit Rush Back	Escape pressure while remaining threatening
2S2	Spirit Rush Down	Down-forward aerial option; corner carry tool
3S2	Bounce!	Overhead; Air Dash cancel on hit/block—mixup setup
5S2	Wild Flares	Multi-hit ground special; safe at -0 on block

3.4.1 Special Move Quick Reference

Move	Name	Range	Primary Purpose
5S1	Foxfire Blast	3/4-screen	Rekka starter; safe projectile at mid-range
2S1	Orb Arc	Fullscreen	Oki tool; wall bounce setups
3S1	Charged Orb	Fullscreen	Unblockable vs crouching; committal
6S2	Spirit Rush Fwd	Dash	Corner carry; aggressive approach
3S2	Bounce!	Close	Overhead; cancel into Air Dash on hit/block
5S2	Wild Flares	Close	Multi-hit; safe at -0 on block

|| 3.5 Supers and Ultimate

Input	Name	Notes
22S1	Essence Theft	Enhanced Orb super; more projectiles. Fullscreen coverage. Can OTG
22S2	Spirit Overdrive	Multi-hit dashes. Works airborne and grounded. Excellent corner carry
S1+S2	Charm (2 bars)	Ultimate. Invincible startup—use as reversal. Slow to startup (19f)

|| 3.6 Assist Moves

Input	Name	Notes
T	Spirit Rush Assist	Rushes forward; crosses through creating sandwich. Easy confirm on hit
4T	Orb Rain Assist	Airborne Orb barrage (3 projectiles). Long-range coverage
2T	Spirit Overdrive Assist	Multi-hit dash super. Only available post-KO

CHAPTER 4

FRAME DATA AND PRACTICAL APPLICATION

4.1 Normal Moves Frame Data

Move	Startup	On Hit	On Block	Notes
5L	5	+2	-2	Fastest; interrupt/tick-throw
2L	6	+2	-1	Godlike low; safe; high/low starter
5M	10	+1	-2	Best range in cast; footsie tool
2M	9	+1	-2	Lower hitbox medium; combo starter
5H	13	-1	-4	Massive range; neutral check
2H	15	Launch	-2	Anti-air; advances forward
3H	18	Launch	-2	Launcher; converts from max-range 5H
2T	9	Launch	-2	Fastest tag launcher in game

4.2 Projectile Timing

Move	Startup	Recovery	Notes
5S1	18f	-2	Standard Orb; ↓ +2f startup. Air OK
2S1	18f	-2	Arc trajectory; fullscreen reach
3S1	24f	-5	Charged; unblockable vs crouch
[S1]	18f	-1	Essence Theft (Super); faster recovery

4.3 Reading Frame Data

★ TIP

Startup: Frames before active. Lower = faster.

On Hit: **Positive** = your turn. **Negative** = opponent's turn.

On Block: **-3 or less** = safe. **-4 or more** = punishable. **Positive** = continue pressure.

Launch = sends airborne; enables air combo.

4.4 Practical Frame Notes

- **5L** at 5f is one of fastest jabs in 2XKO — use to interrupt, counter tick-throws, or start strike-throw mix
- **2L** at -1 is essentially free — your primary low button for 50/50s
- **5M** with exceptional range is the best footsie tool for whiff-punishing mid-range
- **5H** at -4 is relatively safe — excellent in combos and long-range checks
- ► **ZONER: 5S1 (Orb)** at -2 is safe; throw freely at mid-range; recovery covered by projectile travel
- ► **RUSHDOWN: 2S1 (Arc Orb)** at -2 is your safest oki setup; wall bounces give positioning advantage
- **3S1 (Charged)** at -5 is committal — only use when covered or at safe distance

4.5 Supers & Ultimate Frame Data

Move	Startup	Invul	On Block	Notes
22S1	12f	No	−8	OTG capable; fullscreen coverage
22S2	10f	No	−6	Multi-hit; corner carry extension
S1+S2	19f	Yes	—	Reversal; 2 bars; Charm effect on hit

4.6 Punish Windows

★ PUNISH REFERENCE

When you block these, punish immediately with **5L** or **2L** into full combo:

- Any move at **−5** or worse on block (your 5f jab reaches)
- Whiffed grabs: enormous recovery — full punish every time
- Blocked DPs/reversals: wait for invincibility to expire, then punish landing
- **3S1 (Charged Orb)** at **−5**: punishable if not spaced correctly

CHAPTER 5

UNIQUE MECHANICS

5.1 Air Dash System

Ahri is the **only character in 2XKO** with a **traditional air dash**. Activating it with **L+M** or **66** while airborne, she can dash both forward and backward from any air normal or air special (once per airborne sequence).

★ TIP

Most of Ahri's air normals and air specials can be cancelled into an Air Dash. This makes approach angles nearly unpredictable and is used in the majority of longer combo routes.

5.1.1 Baiting Anti-Airs

Air Dash early upon jumping:

- Fly over committed anti-air and land behind opponent
- Creates ambiguous left/right that must be read and re-blocked
- Enables safejump setups and unblockable pressure after knockdown

5.1.2 Air Dash in Combos

The second hit of Foxfire rekka (Foxfire Leap) can be Air Dash cancelled mid-air:

- ► **ZONER**: **S1 > S1 > S1** chain is safe; use 3rd hit for corner positioning
- ► **RUSHDOWN**: **S1 > S1 > AD > j.M > j.H** extends into full mid-air combo

5.2 Spirit Rush — Omnidirectional Dashes

Spirit Rush (any direction + S2) is the only omnidirectional move in 2XKO. On ground: 5 directions. In air: 5 directions.

5.2.1 Ground Directions

Direction	Input	Use Case
Forward	6S2	Aggressive approach; corner carry
Up-Forward	9S2	Hits Warwick more easily (S1 buff); combo extension
Up	8S2	Vertical mobility; escape grabs
Up-Back	7S2	Escape while remaining threatening
Back	4S2	Retreat with attack; reset neutral

5.2.2 Air Directions

Direction	Input	Use Case
Forward	j.6S2	Air combo carry; aggressive approach
Down-Forward	j.3S2	Corner carry; oki positioning
Down	j.2S2	Repositioning; dive attack
Down-Back	j.1S2	Aerial escape with attack
Back	j.4S2	Retreat with threat maintained

★ TIP

Combo Extension Rule: Ahri can cancel into another Spirit Rush if the first one *hits*. She can perform up to two Spirit Rushes before landing. This creates nearly infinite aerial repositioning in longer combos.

|| 5.3 Foxfire Rekka System

5S1 begins the three-hit rekka sequence:

1. **Foxfire Blast (1st)**: Projectile traveling 3/4-screen. Safe to throw at mid range
2. **Foxfire Leap (2nd)**: Advancing follow-up; air-dash cancelable for advanced routing
3. **Foxfire Dive (3rd)**: Ground bounce on hit; conversion into launcher

★ TIP

The entire **s1 > s1 > s1** string is **safe on block**. On hit, convert to full combo. On block, maintain pressure or tag.

|| 5.4 Orb Arc (2S1) and Wall Bounces

- ► **ZONER**: Wall bounces are your primary zoning advantage; position arcs 1-2 character lengths from corner for double-threat coverage
- ► **RUSHDOWN**: Wall bounce oki is devastating; forces opponent navigation or chip accumulation before you apply pressure

|| 5.5 Bounce! Overhead and Air Dash Cancels

Bounce! (3S2) overhead can be cancelled into Air Dash on hit or block:

- After blocked Bounce! + Air Dash: choose double overhead, crossup, single overhead into low, or empty dash throw
- Creates nearly unreactable mixup tree from one blocked situation
- Conditioning is key: use low pressure to condition crouch-blocking, then 3S2 lands as overhead

|| 5.6 Wakeup Oki with Stalking Dart

The primary oki sequence involves Stalking Dart (2S1):

1. End combo with ground bounce into knockdown
2. Input 2S1 on opponent wakeup
3. Stalking Dart explodes and creates free mixup or pins opponent

- ► **ZONER:** Dart persists and forces navigation; chip damage accumulates while opponent deals with threat
- ► **RUSHDOWN:** Dart plants before you dash in for unblockable pressure; recovery-rolling opponents get dash-throw mixed

CHAPTER 6

NEUTRAL GAME

|| 6.1 Core Neutral Pillars

1. **Air superiority** — air dash makes every jump a potential mix or escape
2. **Button coverage** — 5M range is unmatched; poke and whiff-punish effectively
3. ► **ZONER**: Spacing discipline — keep at optimal orb range; avoid close-range engagement
4. ► **RUSHDOWN**: Aggressive approach — use dashes and jumps to apply constant pressure

|| 6.2 Key Neutral Buttons

Button	Frame Data	Use Case
5L	5f startup	Fast interrupt; strike-throw starter
2L	6f startup	Godlike low; safe; primary 50/50 setup
5M	10f startup	Primary footsie; whiff-punish tool
5H	13f startup	Long-range neutral check
5S1	18f startup	Safe projectile at mid-range
2S1	18f startup	Wall bounce positioning tool
j.H	–	Primary air-to-air; beat jumps
j.2L	–	Crossup tool; ambiguous approach

6.2.1 Playstyle-Specific Applications

◆ ZONER NEUTRAL

- Throw fullscreen orbs; position at midscreen
- Opponent blocks → keep applying orbs
- Opponent dashes → punish with **2H** or **5L**
- Use **5M** footsies; never trade at close range

● RUSHDOWN NEUTRAL

- Jump early; air dash over opponent reactions
- Throw Foxfire rekka while advancing safely
- Use Spirit Rush up/forward to reposition fast
- Control air space; force opponent to jump back

6.3 Handling Anti-Airs

When opponents react to jumps with anti-airs, Ahri has responses:

Anti-Air	Ahri Counter
Down H anti-air	Air Dash early > fly over > j.2H from behind
Jump-back air-to-air	Neutral jump j.H to out-range
Reversal/DP on jump	Empty air dash; let them whiff; punish landing
Air throw attempt	Air throw first; she combos from solo air throw

6.4 Air-to-Air Superiority

Ahri excels in the air:

- **j.H**: best horizontal range; counter-hit chains to full combo
- **j.L**: fast; deceptively wide; good quick air checks
- **j.S1**: fires straight forward when opponent expects down-angled projectile
- **Air Dash**: bait anti-airs by dashing over them; punish whiff

CHAPTER 7

MIXUP SYSTEM AND OKI

|| 7.1 Strike-Throw Mix

Ahri's ground mixup uses 5L and 2L with dashes:

1. Condition with low pressure (2L, 2M)
2. Dash in and either 2L (they blocked low) or 6T (they expected low)
3. Tight timing makes reactions nearly impossible

★ TIP

Land this 2-3 times to condition, then break with the opposite option. Ahri's fastest low (2L at 6f) wins most strike-throw windows.

|| 7.2 High/Low with Bounce! Overhead

1. Establish low pressure with 2L, 2M, Foxfire rekka chains
2. Condition opponent to crouch-block
3. Input 3S2 (Bounce!) overhead when they expect another low
4. Air Dash cancel on hit for extended mixup

✓ WARNING

Bounce! startup (slow) makes it reactable raw. Only use in conditioned strings or with Assist covering approach.

|| 7.3 Air Dash and Spirit Rush Mixups

From blocked Heavy attack:

1. Cancel **5H** on block into **8S2 (Spirit Rush Up)**
2. Call Tag Assist simultaneously
3. Air Dash over opponent from above
4. Choose same side or crossup side for left/right confusion

7.4 Falling Spark Ambiguous Crossups

After any knockdown (**3M** or ground bounce):

- Jump and use **j.2L (Falling Spark)** — hits both sides
- Left/right connection timing depends on spacing — difficult to react to
- Cancelable into air Foxfire on hit for full combo follow-up

7.5 Wakeup Oki Strategy

◆ ZONER OKI

- End combos into Swept Away (hard knockdown)
- Plant Stalking Dart on wakeup; maintain distance
- Opponents roll away → punish with backdash throw
- Neutral wakeup → eat explosion → free mixup

● RUSHDOWN OKI

- After knockdown, jump-in immediately for safejump
- Use Falling Spark for ambiguous left/right
- Call Assist for sandwich approach (unblockable)
- Corner: Stalking Dart explodes before dash-in pressure

CHAPTER 8

COMBO GUIDE

8.1 Combo Overview

Route	Difficulty	Damage	Carry	When to Use
5L Starter	Easy	Low	Good	Neutral confirms anywhere
5H Launcher	Easy	Low	Moderate	Max-range punishes
Foxfire AD	Medium	Medium	High	Mid-screen pressure hits
5H Max Range	Medium	Medium	High	Max-range 5H whiff punish
Corner Air Loop	Hard	High	Corner	After any corner carry
Ult Finisher	Hard	Max	Corner	2-bar meter with good read

★ COMBO LEARNING ORDER

Learn the beginner routes first until they are automatic, then layer in the Air Dash extensions. Advanced combos require the Air Dash cancel timing to be muscle memory before attempting the full loop.

8.2 Beginner Combos

● Beginner — 5L Starter

5L ▷ 5M ▷ 5H ▷ jc. ▷ j.M ▷ j.H ▷ j.S1

- Basic ground-to-air conversion
- Works everywhere on screen
- End with air Orb for positioning reset

● Beginner — 5H Launcher

5H ▷ jc. ▷ j.L ▷ j.M ▷ j.H ▷ j.2S1

- Launcher into full air chain
- After landing, reset to neutral for oki setup
- No strict timing required; great for learning

8.3 Intermediate Combos

● Intermediate — Foxfire Rekka with Air Dash Extension

5M ▷ 5H ▷ S1 ▷ S1 ▷ AD ▷ j.M ▷ 3H ▷ jc.

- Air Dash cancel after 2nd Foxfire is the key timing challenge
- Deals more damage and carries farther than beginner route
- Land the final repositioning and continue

● Intermediate — 5H Max Range Confirm

5H ▷ 3H ▷ jc. ▷ j.M ▷ j.H ▷ j.S1 ▷ land ▷ 3H ▷ jc.

- Unique to Ahri: converts from max-range 5H because 3H launcher reaches
- Midair S1 projectile sets up second air loop on landing
- Excellent for mid-screen confirms

8.4 Advanced Combos

● Advanced — Corner Double Air Loop

5L ▷ 5M ▷ 5H ▷ 3H ▷ jc. ▷ j.H ▷ j.S2 ▷ land ▷ 3H ▷ jc. ▷ j.M ▷ j.H ▷ j.S2

- Corner-only route with Tag Launcher ender
- First loop carries opponent into corner
- Tag extends combo for massive team damage

● Advanced — Ult Finisher with Omnidirectional Spirit Rush

5M ▷ S1 ▷ S1 ▷ AD ▷ j.M ▷ j.[H] ▷ j.S1 ▷ land ▷ 3H ▷ jc. ▷ j.M ▷ j.H ▷ j.3S2 ▷ S1+S2

- Half-charged j.H before air Orb is high-damage battery

- Omnidirectional Spirit Rush positions perfectly for Charm Ultimate
- Without 2 bars: end with Hyper Spirit Rush or oki setup instead

8.5 Combo Ender Options

Ender	Situation	Result
j.S1 (air Orb)	Anywhere	Neutral reset; opponent must guess oki
j.3S2 (Spirit Rush)	Mid/Corner	Corner carry; oki positioning
3M (Swept Away)	After launcher	Hard knockdown; primary oki setup
S1+S2 (Charm)	2 bars available	Maximum damage; invincible ender
Tag Launcher	Partner ready	Extend combo with partner for huge damage

CHAPTER 9

MATCHUP STRATEGIES

9.1 Playstyle Matchup Recommendations

Opponent Type	Recommended	Reasoning
Rushdown (Vi, Darius)	Zoner	Maintain distance; orbs force approaches
Other Zoner (Teemo, Jinx)	Rushdown	Use air mobility to navigate projectiles
Grappler (Blitzcrank, Braum)	Zoner	Keep fullscreen; never let them close
Balanced (Ekko, Yasuo)	Either	Choose based on team composition

9.2 vs. Rushdowns

■ Strategy vs. Rushdowns (Vi, Darius)

◆ ZONER

- Maintain distance obsessively; zone with fullscreen orbs
- Backdash to reset spacing when they approach
- Trade orb pressure for positioning advantage
- Never let them land close; anti-air consistently

● RUSHDOWN

- Air Dash early on their jumps; land for mixup
- Use Foxfire rekka to maintain safe pressure
- Exceed their speed through superior air mobility
- Establish corner oki and lock them down

II 9.3 vs. Zoners

■ Strategy vs. Zoners (Teemo, Jinx)

◆ ZONER

- Match their fullscreen coverage; patience wins
- Land one confirm and establish superior oki
- Use wall bounces for positioning advantage
- Outlast their momentum; one hit changes everything

● RUSHDOWN

- Use air dash and Spirit Rush to navigate projectiles
- Jump from angles they can't cover; land confirm
- Once close, pressure is overwhelming
- Use oki Stalking Dart to prevent reset

II 9.4 vs. Grapplers

■ Strategy vs. Grapplers (Blitzcrank, Braum)

- **Never yield close range:** Grapplers can't grab air or fullscreen
- **Zoner:** Maintain distance with continuous orb loops
- **Rushdown:** Air Dash constantly; they can't catch you
- **Whiff punish:** Their grabs have enormous end lag on whiff
- Call Assist for additional threats while you maintain distance

CHAPTER 10

TEAM COMPOSITIONS

10.1 What Ahri Wants in a Partner

- ► **ZONER**: Cover fullscreen or close-range gaps; enable time for zoning setups
- ► **RUSHDOWN**: Extend combo potential; provide defensive coverage during approach
- Both: High damage teammate to compensate for Ahri's lower raw numbers
- Both: Strong tag-in presence for meter extension

10.2 Best Team Pairings

Ahri	Partner	Synergy
Ahri	Ekko	Dual mobility; combined projectile coverage; strong oki layering
Ahri	Vi	Complementary gameplan; zone (Ahri) into close pressure (Vi)
Ahri	Jinx	Fullscreen projectile combo; overwhelming pressure
Ahri	Yasuo	Wind Wall + Orbs; strong Assist synergy
Ahri	Braum	Tanky anchor; shield covers fragility; good team sustain

10.3 Using Ahri as Assist

10.3.1 Forward Assist (Spirit Rush)

Rushes forward; crosses through opponent on hit:

- Creates automatic sandwich with point character
- Easy confirm on hit due to spin property
- Bounces into air on block — Handshake Tag for airdash pressure

10.3.2 Back Assist (Orb Rain)

Airborne Orb barrage (3 projectiles):

- Long-range Assist coverage
- Patch 1.1.3: hitting Ahri stops remaining projectiles
- Use at ranges where point can defend Ahri
- On hit: builds meter and extends combo

10.4 Assist Coverage Chart

Assist	Range	Invul	Meter	Best Used When
Spirit Rush (T)	Close	No	Builds	Point needs sandwich; hit-confirm setup
Orb Rain (4T)	Long	No	Builds	Point needs fullscreen cover; safe poke
Spirit Over-drive (2T)	Mid	Yes	Costs	Post-KO reversal; desperation punish

10.5 Gameplan Summary by Role

◆ AHRI AS POINT (ZONER)

- Open with orbs to establish screen control
- Call back assist (Orb Rain) to layer threats
- Land one confirm; carry to corner
- Tag out after hard knockdown; let partner finish

● AHRI AS POINT (RUSHDOWN)

- Use forward assist (Spirit Rush) for sandwich mix
- Air dash in on assist hit; maximize combo
- Establish corner oki; layer orb dart
- Convert every knockdown into more pressure

CHAPTER 11

ADVANCED CONCEPTS

11.1 Air Mobility Mastery

► ZONER: Air Dashes used defensively:

- Air Dash backward after jump to bait anti-air; let them whiff
- Use bouncing jumps to avoid ground-level projectiles

► RUSHDOWN: Air Dashes used offensively:

- Early air dash over anti-airs; land behind for mixup
- Mid-jump air dash for extended floating; pressure layering
- Delayed air dash for subtle repositioning that's hard to read

11.2 Season 1 Patch Summary (Version 1.1.3)

↓ NERFS — v1.1.3

- **Orb startup** 16f → 18f (+2f) — less oppressive early
- **Backdash** slowed — escape more committal
- **S2 Super** now properly in active frames — interrupts more easily
- **Charm** cooldown increased — less blockstring spam

↑ BUFFS — v1.1.3

- **Spirit Rush** cancels into Orb mid-dash — new routing enabled
- **9S2** hits Warwick more easily — S1 buff

11.3 Decision Tree: Which Option to Use

Situation	Option	Why
Opponent jumps at you	2H anti-air	Fast, advancing; converts to combo
Opponent dashes in	5L interrupt	5f; beats most dashes clean
You need to escape	4S2 or 7S2	Retreat with hitbox attached
After knockdown, mid-screen	2S1 (Stalking Dart)	Plants oki; forces navigation
After knockdown, corner	j.2L (Falling Spark)	Ambiguous crossup; forces error
Opponent at fullscreen	5S1 chain	Safe rekka; builds pressure
You're low HP, cornered	S1+S2 (Charm)	Invincible reversal; use 2 bars
Need meter, safe spot	5S1 > 5S1 > 5S1	Entire string safe on block

11.4 Common Mistakes

✓ TOP MISTAKES TO AVOID

- **Trading at 900 HP:** You always lose even trades — use air mobility to dis-engage
- **Raw Bounce!:** Fully reactable without conditioning or Assist cover; set it up first
- **Whiffing Spirit Rush:** Recovery frames are punishable — only use when the hit is confirmed
- **Predictable Air Dashes:** Vary direction, timing, and height constantly or get anti-ai'd
- **Forgetting Stalking Dart oki:** The explosion is your primary oki tool; always place after Limit Strike
- **Over-spending meter:** Reserve bars for Charm reversal when low HP — it can save rounds

11.5 Upcoming Content and Future Patches

As of **March 10, 2026**, Riot Games has teased the following upcoming champions and changes:

★ HORIZON PREVIEW

Teased Champions:

- **Akail** — Champion archetype and mechanics TBD; official reveal expected in coming months
- **Senna** — Roleposition and kit details TBD; gameplay reveal pending

These new champions will expand the 2XKO roster beyond the current 12 and may introduce new playstyle archetypes or team synergies. Keep an eye on the official 2XKO website and community channels for announcements.

✓ BALANCE PATCH SCHEDULE

Riot commits to regular balance patches. After v1.1.3 (March 2026):

- Monitor official patch notes for Ahri adjustments
- Frame data and combo routes may change with future updates
- Playstyle viability can shift based on matchup metagame evolution
- Update your guides as new information becomes available

This Master Guide combines the Zoning and Rushdown variants of Ahri from the *complete_guide* and *AKITSUNE* community sources.

Choose the variant that matches your playstyle, or learn both for maximum flexibility.

Season 1 • Version 1.1.3 • March 2026

Game data subject to change with future patches.
